As an example, in the first quarter 2012 structured products offered to the public (such as equity-linked bonds) generated a positive effect of approximately SEK 330m in Equity-related instruments and a corresponding negative effect in Debt-related instruments.

### Market risk

The Group's risk taking in trading operations is primarily measured by value at risk, VaR. The Group has chosen a level of 99 per cent probability and a ten-day time-horizon for reporting. In the day-to-day risk management of trading positions, SEB follows up limits with a one-day time horizon. All risk exposures are well within the Board's

decided limits. The table below shows the VaR exposure by risk type. Trading book VaR increased at the beginning of the quarter due to the increased risk within Merchant Banking and the decreasing diversification effect. The risk slightly decreased later during Q1 with the diversification effect staying at relatively high level.

\* Where of Sweden 10.8bn and Cards 3.2bn

\*\* Where of Estonia 2.0bn, Latvia 2.6bn, Lithuania 3.3bn and Baltic RHC 0.2

Following the increased clarification of the Basel III regulation for capital, liquidity and funding to be implemented in Sweden starting 2013, SEB has continued to align the framework for capital and liquidity management. In 2012, SEK 16bn more capital has been allocated to the divisions from the central function. In addition, internal funds transfer prices more fully reflect the increased cost of funding and buffers of liquidity required going forward. Further refinements are likely during 2012.

## Gamla Livförsäkringsaktiebolaget

Traditional insurance business is operated in Gamla Livförsäkringsaktiebolaget SEB Trygg Liv (Gamla Liv). The entity is operated according to mutual principles and is not consolidated in SEB Trygg Liv's result. Gamla Liv is closed for new business since 1997. The policyholder organisation, Trygg Stiftelsen (the Trygg Foundation), has the purpose to secure policyholders' influence in Gamla Liv. The Trygg Foundation is entitled to:

- Appoint two board members of Gamla Liv and, jointly with SEB, appoint the Chairman of the Board, which consists of five members.
- Appoint the majority of members and the Chairman of the Finance Delegation, which is responsible for the asset management of Gamla Liv.

## Surplus values

Surplus values are the present values of future profits from existing insurance contracts. The calculation is made to better understand the value and profitability of long term insurance contracts. In the ordinary accounts the income from the contracts is reported throughout the duration of the contract but much of the expenses

arise at the point of sale. This causes a mismatch in time between income and expenses. The surplus value reporting is in accordance with international practice and reviewed annually by external actuaries. Surplus values are not consolidated in the SEB Group accounts.

### Sensitivity to changes in assumptions (total division).

Change in discount rate +1 per cent	-1,722
" -1 per cent	2,012
Change in value growth +1 per cent	2,014
of investment assets -1 per cent	-1,771

<sup>1)</sup> Effects from adjustments of the calculation method. Q1 2012 is also related to the previously not included subsidiary Irish Life International. Q2-3 2011 is related to previously not included products in Denmark.

<sup>2)</sup> Sales defined as new contracts and extra premiums in existing contracts.

<sup>3)</sup> The reported actual outcome of contracts signed can be placed in relation to the operative assumptions that were made. Thus, the value of the deviations can be estimated. The most important components consist of extensions of contracts as well as cancellations. However, the actual income and administrative expenses are included in full in the operating result.

<sup>4)</sup> Deferred acquisition costs are capitalised in the accounts and amortised according to plan. The reported change in surplus values is therefore adjusted by the net result of the capitalisation and amortisation during the period.

<sup>5)</sup> Assumed unit growth is 5.0 per cent gross (before fees and taxes). Actual growth results in positive or negative financial effects.

<sup>6)</sup> A lowering of the discount rate had a positive effect in Q4 2011 of some SEK 800m but lower expected growth in fund values had a negative effect of some SEK 300m and higher frequency of surrenders, lapse and transfers had a negative effect of some SEK 700m.

<sup>7)</sup> The calculated surplus value is not included in the SEB Group's consolidated accounts. The closing balance is shown after deduction of capitalised acquisition costs (SEK 4,113m at March 31, 2012).
